

Webmail

How can I enable the Sent folder in Webmail?

IgLou [Webmail](#) does not automatically save outgoing mail to the Sent folder.

You can enable the saving of your outbound email to a special folder named "Sent", but be aware that this can quickly consume all of your available Webmail folder space if you frequently send email with attachments.

To enable the saving of mail to the Sent folder, click on the [Options](#) link at the top of the Webmail screen, and then click on [Folder Preferences](#). Under the option Save outgoing mail to Sent Folder, select Yes and then click [Submit](#):

The screenshot displays the 'Options - Folder Preferences' interface of IgLou's Webmail. At the top, there is a navigation bar with links: INBOX, Compose, Addresses, Folders, Options, Search, Mailblock, Help, and Sign Out. The main content area is titled 'Options - Folder Preferences' and contains a section for 'Special Folder Options'. This section includes two dropdown menus: 'Trash Folder' set to 'Trash' and 'Draft Folder' set to 'Drafts'. Below these, the option 'Save outgoing email to Sent folder:' is presented with two radio buttons. The 'Yes' radio button is selected and highlighted with a yellow background, while the 'No' radio button is unselected.
