

Webmail

Technical support for IgLou Webmail

IgLou introduced a new [Webmail](#) in early 2022 that offers a number of improvements, including:

- Full support for smart phones and tablets
- New modern interface
- Compose messages in HTML with custom fonts and text effects
- Improved file attachment support
- Desktop notifications

While we do not have documentation available for all of Webmail's features, the interface is similar to using Microsoft Outlook, one of the world's most popular email software programs. If you have questions or need assistance using Webmail, please [contact our technical support department](#) and we'll be happy to assist.

Unique solution ID: #1119
