How to setup Eero Wifi

1. Download the Eero App for iOS or Android at eero.com/app.

2. Open the App and setup a Eero Account and follow the instructions.

High Speed Internet

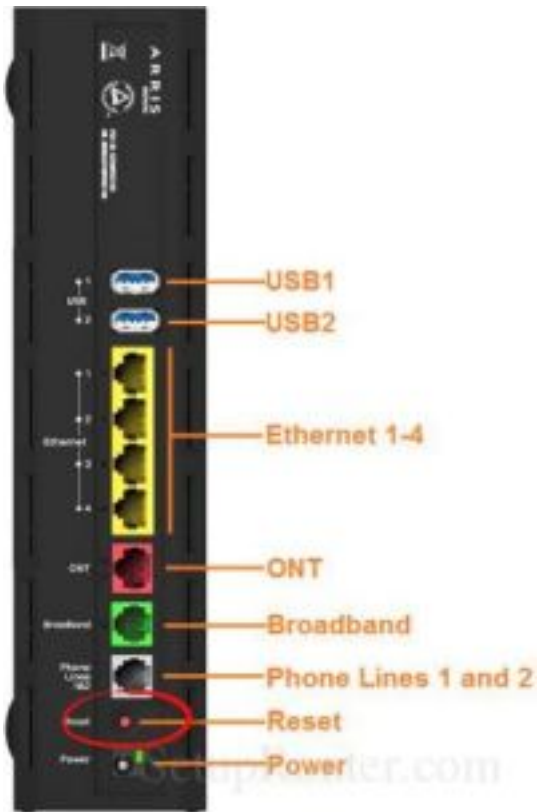

3. Select 'eero' for the device you are setting up as the gateway.

High Speed Internet

4. Connect the Eero to one of the 4 yellow ethernet jacks on the back of the modem and plug it into an electrical outlet. The modem should be on with a solid green Broadband light.

High Speed Internet

5. Choose the location of your Eero.

The screenshot shows the 'Gateway eero Setup' app interface. At the top, there is a status bar with the time 11:52, signal strength, Wi-Fi, and battery icons. Below the status bar, the app title 'Gateway eero Setup' is displayed with a close button (X). The main content area is titled 'Where's your eero?' and includes the instruction 'Select its location so you can identify it later.' Below this, there is a list of room options, each with a radio button to its right:

- Basement
- Bedroom
- Dining Room
- Family Room
- Garage
- Hallway
- Kitchen
- Living Room

At the bottom of the screen, there is a navigation bar with three icons: a hamburger menu (three vertical lines), a home button (a circle), and a back button (a left-pointing arrow).

6. Create your network. Enter a Network name for your Eero Wifi and a password. This will be the new Wifi network and password you will connect your devices to once setup is complete.

7. If you have more than one Eero, follow the steps to add another Eero device. Make sure you choose 'eero' as your device.

High Speed Internet

8. Once setup is complete and your devices have been connected to the new network that you created, contact IgLou and ask them to disable the wifi built into the modem. This prevents interference between the two devices.
